PARIS-SACLAY
FRANCE

THE PROGRAMME

MIC Vietnam at a Glance

An Erasmus+ academic mobility initiative connecting VNU University of Medicine and Pharmacy and Université Paris-Saclay through international exchanges in Medicine and Pharmacy.

TEACHING

Faculty mobility
for teaching
activities

TRAINING

Professional
and academic
training

STUDIES

Student mobility
(BSc, MSc, PhD)

INTERNSHIP

Clinical, laboratory
and professional
experience

International
exposure

Stronger academic
networks

Shared knowledge for
global challenges

A more open
and inclusive community

Incoming Mobility

Paris-Saclay → VNU-UMP

Bringing international expertise to Hanoi.

As part of the Erasmus+ MIC project, VNU University of Medicine and Pharmacy (VNU-UMP) welcomed academic and professional representatives from Université Paris-Saclay to strengthen academic exchange, professional development and long-term cooperation in Medicine, Pharmacy and Nuclear Medicine.

MIC VIETNAM

ERASMUS+
INTERNATIONAL
ACADEMIC MOBILITY

UNIVERSITÉ PARIS-SACLAY → VNU-UMP | 16-23 MAY 2026

ACADEMIC LECTURES

For Pharmacy students and faculty

- Pharmaceutical Care for Older People – Prof. Patrick Hindlet
- Drug Discovery and Design: Concepts, Principles and Techniques – Prof. Hà Dương Tập

CLINICAL EXCHANGE

VNU - UMP Hospital – Linh Dam Campus

- Exchange on clinical projects, medication management and the application of pharmaceutical sciences in clinical practice.

RESEARCH COLLABORATION

3 Pharmacy research groups

- Discussions on research collaboration
- Technical guidance
- Research data management
- Computer-aided drug design
- Bioactive molecules

UNIVERSITÉ PARIS-SACLAY → VNU-UMP | 25-29 JUNE 2026

ACADEMIC & INSTITUTIONAL EXCHANGE

Discussions on student, resident, PhD candidate and healthcare staff mobility

Exploration of postgraduate training and joint supervision/degree pathways

NUCLEAR MEDICINE COLLABORATION

Exchange on specialised training, clinical practice and professional development

Sharing of expertise and best practices

HOSPITAL VISITS UMP Hospital – Linh Đàm Campus Hospital E

Discussion on the university hospital model, research capacity and the future development of nuclear Medicine

Exploring opportunities for training, research, expert exchange and student clinical practice

SCIENTIFIC CONFERENCE PARTICIPATION

Joined the conference on Advances in Immunotherapy, Oncology and Nuclear Medicine 2026

26 – 27 June 2026
Bach Mai Hospital

DEVELOPMENT OF CONTINUING EDUCATION IN NUCLEAR MEDICINE

VNU-UMP × Université Paris-Saclay | 2026 – ongoing development

A NEW STEP IN OUR PARTNERSHIP

Building on the Erasmus+ MIC partnership, VNU-UMP and **Université Paris-Saclay** are developing a continuing education programme in Nuclear Medicine using the **PixiLearn (Pixilib)** digital learning platform.

With the support of **United Imaging**, the three partners are exploring a joint cooperation model to deliver high-quality, innovative and accessible training for healthcare professionals.

UNITED
IMAGING

THE PROGRAMME AIMS TO

Provide interactive,
case-based
learning

Facilitate real-time
interaction between
instructors and
learners

Expand access to
specialised
Nuclear Medicine
knowledge

Support
continuing
professional
development

- ✓ Virtual learning environment
- ✓ Real clinical cases
- ✓ Real-time interaction
- ✓ Progress tracking
- ✓ DPC & Qualiopi certified

universit  PARIS-SACLAY UMP UNITED IMAGING

Training Program:
**FRANCO-VIETNAMESE
NUCLEAR MEDICINE**

PROGRAM OVERVIEW

Joint program by University of Paris-Saclay & VNU University of Medicine and Pharmacy
Advanced training in Nuclear Medicine using PixiLearn interactive platform

OBJECTIVES

- Develop CME in Nuclear Medicine in Vietnam
- Apply interactive, case-based learning
- Advancing Nuclear Medicine in: Oncology, Cardiology, and Immuno-Inflammatory
- Promote Franco-Vietnamese collaboration

TRAINING FOCUS

- April 2026
- SPECT, SPECT/CT
- PET, PET/CT
- Theranostics
- Clinical cases

KEY FEATURES

- Interactive platform
- Real-time feedback
- International experts
- Advanced imaging tech

From knowledge
to practice.

From collaboration
to impact.

MIC VIETNAM

ERASMUS+
INTERNATIONAL
ACADEMIC MOBILITY

Outgoing Mobility

VNU-UMP → Université Paris-Saclay

FIELDS OF MOBILITY

Studies

Short-term (BSc, MSc, PhD)
3-6 months each (3 students/semester)

Internships

Research labs, hospitals, PPIs
1-3 months each (3-5 students/ cohort)

Training

Specialized training (e.g. lab techniques, clinical skills)
5-14 days/ cohort | 1-2 cohorts/year

International Exposure

Conferences, summer schools, academic events
Variable duration

TARGET AREAS

Medicine & Health Sciences

Clinical training | Public health |
Biomedical research

Life Sciences & Pharmacy

Pharmaceutical sciences |
Biotechnology

Research & Innovation

Joint projects | Access to advanced
facilities

Intercultural Competence

Global mindset | Leadership |
Language skills

Building
People & People
Connections

Pharmacy Academic & Research Exchange

VNU-UMP → Université Paris-Saclay | 27 April – 08 May 2026

DELEGATION

Prof. Nguyen Thanh Hai • Dr. Trinh Ngoc Duong

RESEARCH & INSTITUTIONAL VISITS

- Institut Galien Paris-Saclay (IGPS)
- BioCIS / School of Pharmacy
- Exchange with research teams on pharmaceutical science, drug delivery and innovation

ERASMUS+ MIC COOPERATION

- Discussions with the School of Pharmacy and International Relations Office
- Training and mobility opportunities
- Identification of areas for longer-term academic collaboration

RESEARCH COLLABORATION

- Microfluidics and capillary electrophoresis
- Nano-protein interactions in biological fluids
- Potential MSc internship / research mobility under MIC

KEY OUTCOME

Strengthened links between VNU-UMP and Paris-Saclay research groups and created a practical basis for joint research and future student mobility.

Medicine & Professional Training in France

VNU-UMP → Université Paris-Saclay | June 2026

DELEGATION

Assoc. Prof. Ngo Manh Hùng → Assoc. Prof. Nguyen Viet Ha

NEUROSURGERY TRAINING

Assoc. Prof. Ngo Manh Hung
Two-week professional training at
Bioètre Hospital

CLINICAL TOPICS

- 01 Diagnostic, treatment & follow-up
of Chiari disease
- 02 Treatment of cerebral aneurysms

MOBILITY VALUE

Clinical exposure
Specialised neurosurgical practice
Exchange with French clinical teams
Professional network development

MIC VIETNAM

ERASMUS+
INTERNATIONAL
ACADEMIC MOBILITY

Impact

Mobility Creates Change.

Academic Advancement

Enhanced
knowledge, skills
and research capacity.

Capacity Building

Stronger teaching,
training and
institutional capacity.

Research & Innovation

New collaborations
and joint research
initiatives.

Global Citizenship

Greater intercultural
understanding and
a more inclusive
academic community.

A Healthier Tomorrow

Contributing to better
healthcare, stronger
communities and
a more sustainable
future.

09

mobility participants
(2025 – 2026)

100%

reported enhanced
skills and knowledge

New

partnerships
and joint initiatives

Real-world

solutions for
health challenges

MIC VIETNAM

ERASMUS+
INTERNATIONAL
ACADEMIC MOBILITY

Looking Ahead

Expanding Opportunities. Deepening Impact.

More Mobility Opportunities

- Increase student and faculty exchanges
- Diversify mobility formats (short-term, long-term, hybrid)

Deeper Academic Collaboration

- Joint teaching and research initiatives
- Expand collaboration in Nuclear Medicine and other priority fields
- Develop joint programs and co-supervision

Stronger Community and Networks

- Engage more students, faculty and alumni
- Build a vibrant and supportive international community
- Create platforms for knowledge sharing and long-term partnerships

Greater Societal Impact

- Translate knowledge into real-world solutions
- Contribute to healthier communities and sustainable development
- Strengthen the role of higher education in global health challenges

“
A healthier tomorrow
through stronger
global connections.”
